Subject: MLPA

I have to question if we really need more MLPA areas. It seems to me that it is just an attempt to keep most of the population off/out of the water with biased information. There does not seem to be enough common sense in decision making. With implantation of more MLPA you will discourage citizens to continue to be involved as sportsmen and sportswomen in California. This will result in lost license fees which this state desperately needs for our wildlife.
